IBM Watson IoT Platform Journey

Lite Non-Production Production

The screenshot displays the IBM Watson IoT Platform interface. The main heading is "Browse Devices". Below it, there are two tabs: "All Devices" (selected) and "Diagnose". A paragraph explains that the table shows a summary of all devices added, which can be filtered, organized, and searched. Below this is a search bar labeled "Search by Device ID" and a "Device Simulator" toggle switch. The table lists one device with the following details:

Device ID	Status	Device Type	Class ID	Date Added
19004	Disconnected	NodeMCU	Device	Oct 28, 2022 10:02 AM

At the bottom of the table, it indicates "Items per page 50" and "1-1 of 1 item". A modal box at the bottom right shows "1 Simulation running". The top navigation bar includes tabs for "Browse", "Action", "Device Types", and "Interfaces". The right sidebar shows the user's email "2004206ec@cit.edu.in" and ID "j4san9", along with an "Add Device" button. The bottom of the screen shows a Windows taskbar with various application icons and the system clock showing 23:09 on 15-11-2022.
